

HIMANSHU KUMAR

Senior Software Developer | Backend & Node.js Specialist

+91-9097722868 • himanshu526@gmail.com • [linkedin.com/in/himanshu-kumar-009bbb1a8](https://www.linkedin.com/in/himanshu-kumar-009bbb1a8) • Noida, India

Backend-focused software engineer with 4+ years of experience building scalable Node.js applications, REST APIs, and microservices. Delivered production systems across insurance, e-commerce, and real-time domains — including an Axis Max Life Insurance platform serving thousands of agents and an e-commerce microservices architecture handling 10,000+ daily transactions. Proven track record of reducing API latency, integrating payment and notification gateways, and owning backend modules end-to-end from design to deployment.

TECHNICAL SKILLS

JavaScript (ES6+), Node.js, NestJS, Express.js, LoopBack 4, React.js, MongoDB, MySQL, Redis, AWS (EC2, S3, CloudWatch), Git, GitHub, Socket.IO, Firebase, Agora, Stripe, Razorpay, TextLocal SMS, Aisensy (WhatsApp), REST APIs, Microservices, Event-driven Architecture

PROFESSIONAL EXPERIENCE

Monocept Consulting Pvt. Ltd. | Gurugram

Jun 2024 – Present

Senior Software Developer

- Developed and maintained backend services for the MPRO platform (Axis Max Life Insurance), enabling dynamic onboarding of insurance products across a network of 5,000+ agents nationwide.
- Redesigned the policy creation API workflow using Node.js and LoopBack 4, reducing average response time by ~35% and cutting policy submission errors by 20%.
- Architected modular, reusable service components that reduced new product onboarding time from 2 weeks to 3 days.
- Integrated AWS CloudWatch dashboards and custom alarms, achieving 99.5% service uptime and cutting meantime to detect (MTTD) production incidents by 50%.
- Collaborated with cross-functional teams (product, compliance, QA) to deliver 3 major regulatory feature releases on schedule with zero production rollbacks.

Sparx IT Solutions Pvt. Ltd. | Noida

Jun 2022 – May 2024

Software Developer

- Owned backend development across 5 client products simultaneously, writing and maintaining 60+ REST API endpoints with full test coverage in Node.js/Express.js.
- Built a microservices architecture for CARORBIS (car parts e-commerce), decomposing a monolith into 6 independent services (Admin, Order, User, Email, Shipping, Catalog), reducing deployment time by 40%.
- Developed a real-time dating application (TIITLI) supporting 500+ concurrent users with Socket.IO chat and Agora-powered video calls; handled spikes with zero downtime.
- Integrated Stripe payment gateway and Firebase push notifications for GG Studio Booking; processed 1,000+ transactions in first month post-launch.
- Implemented WhatsApp (Aisensy) and SMS (TextLocal) notification pipelines for MetalsBuy, improving order confirmation delivery rate from 72% to 98%.
- Mentored 2 junior developers, conducted code reviews, and introduced Git branching conventions that reduced merge conflicts by 30%.

Mobikasa Pvt. Ltd. | Delhi

Jan 2022 – Jun 2022

Software Developer Trainee

- Completed intensive 6-month backend engineering program; built 3 full CRUD applications using Node.js, Express.js, and MongoDB with RESTful API design.

- Gained foundational knowledge in asynchronous Node.js patterns, schema design with Mongoose, and API security best practices.

KEY PROJECTS

MPRO – Axis Max Life Insurance Platform

Jun 2024 – Present

- Designed the backend architecture for a large-scale insurance platform with dynamic product configuration; system processes 10,000+ policy applications per month.
- Built an audit logging module using AWS S3 and CloudWatch for regulatory compliance (IRDAI), eliminating manual reporting effort of ~8 hours/week.

Tech Stack: Node.js, LoopBack 4, MongoDB, REST APIs, AWS (EC2, S3, CloudWatch)

CARORBIT – Automotive E-Commerce (Microservices)

Dec 2023 – May 2024

- Designed and implemented a 6-service microservices system from scratch, enabling independent scaling of catalog (high-read) vs. order (high-write) workloads.
- Implemented inter-service communication via REST with circuit breaker patterns, reducing cascading failure risk across services.

Tech Stack: Node.js, Express.js, MongoDB, AWS, JavaScript

TIITLI – Real-Time Dating App (Web & Mobile)

Aug 2023 – Nov 2023

- Built real-time 1-on-1 and group chat with Socket.IO supporting 500+ concurrent connections; implemented message delivery receipts and typing indicators.
- Integrated Agora SDK for low-latency video calls; optimised token generation and session management, reducing call setup time to under 2 seconds.

Tech Stack: Node.js, Express.js, MongoDB, Socket.IO, Agora, Firebase

MetalsBuy – B2B Metals Marketplace

Nov 2022 – Mar 2023

- Built a flexible role-permission system supporting 5 user roles with granular access control across 30+ API endpoints.
- Developed a complex custom shipping engine supporting lot-wise pricing logic and coupon stacking, reducing checkout errors by 25%.

Tech Stack: Node.js, Express.js, MongoDB, Socket.IO, Agora, Firebase, TextLocal, Aisensy

EDUCATION

Dronacharya Group of Institutions, Greater Noida | AKTU University

2018 – 2022

B.Tech – Computer Science & Engineering

ADDITIONAL HIGHLIGHTS

- Consistently owned modules end-to-end: requirements → design → development → deployment → monitoring.
- Comfortable with production on-call responsibilities; experienced in reading CloudWatch logs and debugging live issues under pressure.
- Strong documentation habits: all APIs delivered with Postman collections and inline JSDoc comments as standard practice.
